Administrative Bulletin Index

Introduction

The Executive Office for Administration and Finance publishes a series of Administrative Bulletins each year which regulate agencies and departments within the Commonwealth. These bulletins cover a variety of subjects, including personnel policies, state contracts and administrative budgets.

This index is a subject listing of Bulletins from 1972 to 1987. They are available in the State Library in both paper copy and microform.

Each entry gives a broad subject heading for the bulletin followed by some specific aspects of it. Names of government agencies involved in the administration of the regulation are included, as well as pertinent information on forms to be filed. The date of issuance is given as a point of reference.

For government researchers, two important items have been included. The first is the status of the bulletin as it relates to other bulletins in the index. Thus, researchers can easily tell whether the bulletin they are researching has been amended or superseded. A list of the abbreviations used in this status field is also given preceding the index.

The second research tool in the index is the citation to Massachusetts statutory authority. This citation is given only if the statutory authority is cited in the text of the bulletin. All citations have been put into proper legal format using A Uniform System of Citation, 13th Ed.
